

previous work

Dalston Lane Terrace

Client: Murphy Homes

New build mixed use development in partnership with Hackney Council comprising 44 private sale residential units above and to the rear of 10 new retail units. Steel framed construction, using traditional materials to the front façade and a contemporary design to the rear elevation.

Warriner Gardens

Client: Marsa Holdings

9 new luxury five storey town houses in Battersea. Logistically challenging build with secant piled basement walls covering the footprint of the site. RC frame podium with brickwork façade and zinc mansard roof. Bespoke high spec fit out and M&E installations throughout.

Balfe Street

Client: Institute of Physics

New build commercial development to provide the new headquarters for the Institute of Physics. Construction included a double basement excavation, new RC frame, geothermal piling, underpinning to adjoining buildings and façade retention on 2 elevations.

Kings Cross Bridge

Client: UK Real Estate

New steel framed commercial development in Kings Cross constructed directly above 2 rail tunnels with the retained basement slab forming the tunnel soffit of the Metropolitan Line. Extensive interface with TFL & NR, with associated permissions, approvals and special insurance arrangements.

Douglas Close

Client: Notting Hill Housing Association

New build residential scheme in Stanmore delivering 53nr flats in five blocks and 26nr semi-detached houses of mixed tenure from affordable rent to private sale

Brandon Street

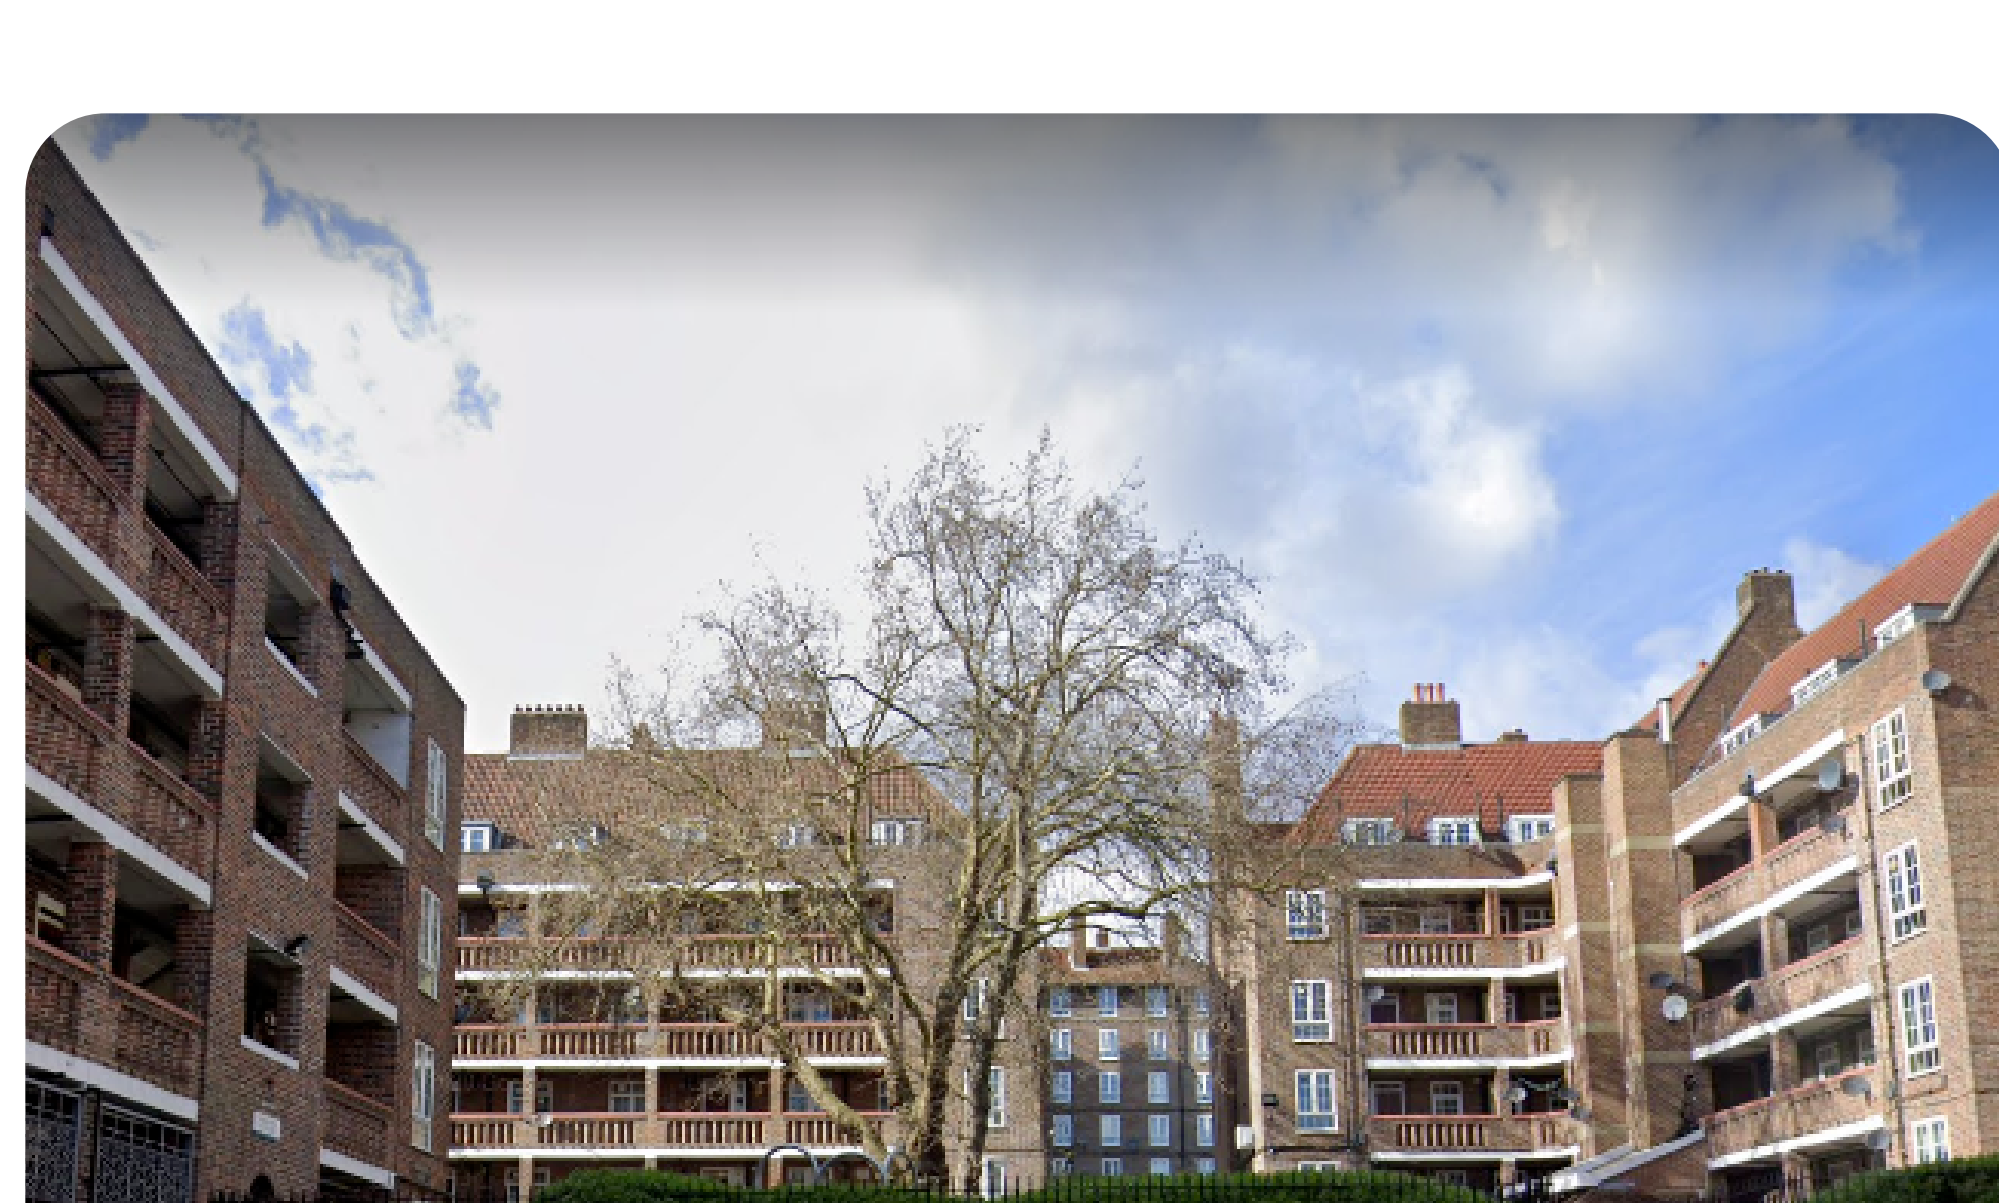

Client: L&Q Housing Association

New build residential development in Elephant & Castle comprising 18 apartments for social rent. Award winning design with concave and convex curved tiled façade split over the 2 blocks. Panellised light gauge steel frame floor and wall cassette system on RC podium.

Royal Military Academy (Ph 1)

Client: Durkan Homes

Conversion of Grade II listed buildings at former army barracks in Woolwich providing 328 mixed tenure residential apartments and houses, split into several phases including the provision of new build social housing apartment blocks delivered as part of the S106 agreement with the Local Authority.

Dulwich Estate

Client: Southwark Council

Refurbishment of 750 tenanted & leaseholder units over 22 blocks comprising significant internal and external renovation works as part of the government's decent homes programme.

Garfield Primary School

Client: Enfield Council

Working closely with the appointed volumetric supplier to deliver a new modular construction primary school including extensive civil works, foundations & retaining structures to support the new buildings and manage significant site level changes.
